Chris-

Any chance you would be able to approve the proposed modifications to the ELGE system monitoring what were incorporated into table B-7 the was submitted to EPA on August 1, 2017. I don't think we ever received formal approval.

Thanks

Glen

Glen,

Good afternoon. Writing to catch up on a few things:

- 1) I'll be sending over a letter with approval of contractor switch.
- 2) I also have a few comments coming across for last year's LMP report so we can formally close that phase of work out.
- 3) Lastly, would you happen to have an electronic version of the 2018 annual performance monitoring report that you submitted this spring (March 29)? I have a hard copy but the electronic version saves a lot of effort getting into our filing system. I apologize if you included this in the hard copy submission. I just can't seem to find it.

Hope all is well. Thanks — Chris

Chris-

A hardcopy of this is coming your way. We are proposing to replace Golder with HGL on the Keystone project. Please contact me if you have any questions.

Thanks,

Glen
